

**When and Where**

**Date:** April 10, 2015

**Start:** 6:30PM

**End:** 7:30PM

**Room:** El Pueblo

**Role**

**Primary Facilitator:** Alex Sears

**Timekeeper:** Drew Hearing

**Minute Taker:** Olga Maneylova

**Attending:** Alex Sears, Tyler Blatt, Judson August, Drew Hearing, Olga Maneylova

**1. Objective**

Assess current status of the project and plan out and divvy up work for the final iteration.

**2. Status**

All parts of iteration 2 are completed. Feedback was okay. There are still use cases that need to be finished on the app.

**3. Discussion**

3.1 We needed to discuss the feedback we got from the second iteration presentation. It seems our presentation left a lot to be desired. So we will need to put more time into our presentation for the final iteration.

3.2 We made a list of use cases that still need to be developed. That works was distributed among everyone.

3.3 We looked at what paperwork needed to be done for the final project and distributed that evenly between everyone on the team.

**4. Wrap Up**

Each person has been given responsibilities to work on for this iteration. Much of the paperwork is done. Some need to be revamped totally since it may have been done wrong up to this point. We also will need to meet again before this iteration ends to go over the presentation.
